Best Practices successfully implemented by the College in the year 2017-2018

Title of the Practice: - 1) Environment what is it?

Green Campus

We have taken this practice because it is necessary to nurture the nature for our future

1) Plantation and preservation itself is the need of hour, wherever we observe around us for examination, birds, animals the verity of trees, fruits are the integral part of environment.

The geographical condition of the area average temperature during the summer average rain fall and the agricultural field that fulfils the requirement not only of farmers but also people in general depend on the satisfactory rain fall. The percentage of the rain fall is directly tied with the plantation and preservation of trees in the territory.

2) **Objectives of the practices:** College makes tree plantation with the help of NSS volunteers in the campus and outside the campus on the occasion of Hon. Presidents' birthday, world environment day and government tree plantation scheme. In the rainy season those trees neither have nor are survived, new saplings planted on such places. Similarly on vacant places variety of plants are planted through NSS volunteers. The responsibility of the conservation is bestowed on a group of students. NSS programme officers monitors the conservation of trees.

The basic purpose of plantation and preservation is to maintain the greenery and the temperature in the surroundings. It is of utmost importance to plant trees every year because they maintained oxygen layer in the atmosphere and naturally the global warming diminished. Preservation of trees are necessary to maintain the eco - balance, to have satisfactory rainfall, to reduce the intensity of the problem of global warming, to provide natural habit to birds, animals and insects.

The ground water level is maintained by the trees and kind of filtered oxygen is being offered to the pupils, birds, animals and all living creatures in the vicinity. Trees work as wind breaks and the rainfall is assured during the season when it is in full swing.

3) The Context:

1) To make college campus green.

2) To make the campus air fresh and create natural beauty in the campus.

3) To impart the message of "plant trees and conserve trees" to society through students.

The deforestation on a large scale cutting of trees for the purpose of fuel, cutting of trees as a building material or furniture make our forest just like a desert. It is experienced at every year that the temperature of the earth is growing with high pace every summer.

The result is that the natural habitat of the wild animals and the variety of birds are on the verge of extinction. It is indeed difficult to plant and develop a tree because it is a work of dedication not just a part of inauguration. We have to maintain the balance of natural gases in the atmosphere. We have to look after the healthy society, nature full of variety of birds, animals and therefore plantation and preservation is the basic need of this time.

4) The Practice: Forest resources are a natural gift. Since time unknown man depends on plants and animals closely associated with forest. Ancient human beings used to satisfy basic needs completely from forest.

Even today we enjoy direct or indirect benefits of forest. Human life is dependant by and large on forest and forest resources. Forest resources is therefore considered as one of the most important and basic natural resource.

Consistence is another part of plantation and preservation upliftment of the plants is a part of continuous dedication. It needs a master plan sufficient man power, water resources proper care during the infancy stage of the plants, tree guards, insecticides, pesticides etc. metro logically in what so ever the country may be 33% land should be covered by forest. In ancient times 60% part of the earth was occupied by the forest. But today this percentage become very less and comes below 25%. Trees are sacred and cutting them is a crime. The trees like banyan can survive for more than 200 years. We should inspire and encourage such organization and institute which not only part the trees but also conserve them. It is the basic need at the hour to plant the trees. They attract rain, maintain ground water level. We have to design a master plan for the plantation. It is a team work and every member in a family school, college, hospital should give his or her contribution in it. Then only the mission can be successful. We have to do Something for our coming generation. Just like water bottle, we have to carry oxygen cylinder on our back if the cutting of trees will remain in continuation.

While undertaking the project of tree plantation and preservation there are certain constraints / limitations in the activity are as follows.

- 1) Sufficient storage of water
- 2) Day to day maintenance of the plants
- 3) Application of insecticide, pesticides whenever the situation occurs.
- 4) To protect plants from the stray animals
- 5) Looking after the plants in infancy stage is indeed a difficult and challenging job.
- 6) Government should provide plants as well as tree guards at reasonable cost.

5) **Evidence of success:** Forest help on a large scale to maintain the balance of nature. From time unknown man is trying to satisfy his basic needs like food, clothing and shelter. Words fail us to describe the benefits of forests. Yet following are some of the outstanding advantages of trees.

A) **Trees provide food:** An apple a day keeps the doctors away. Trees provide foods for birds and wild life.

B) **Trees give pure air to the tired city lungs:-** Trees absorb odors and pollutant gases. In one year an acre of mature trees can provide enough oxygen for 18 people.

C) **Tree save water:-** Trees hold the water during the rainy season and maintained the ground water level.

D) **Trees shield children from ultra-violet rays:** - Skin cancer is the most common form of cancer in the United States. Trees provide protection to children and school campus and play grounds where children spend hours outdoors.

E) **Trees help prevent soil erosion:** - On hill side or stream slopes trees slow run of and hold soil in place.

F) **Trees are teachers and play mates:-** Whether as houses for children or creative and spiritual Inspiration for adults, trees have provided the space for human retreat throughout the ages.

G) Trees provide us medicine, fiber, fruits, threads, rubber, honey. Trees are helpful to textile industry also. Turpentine, gum, resin, tannin are the gifts given by the forests.

H) Land becomes fertile when the dried leaves fall from the trees; they decomposed and mix with the soil.

2) Title of the Practice: - Felicitation of Meritorious Students

1) Felicitation is another name of appreciation, praise or acknowledgement encouragement for future in career education of job placement. The aim is to encourage the outgoing students and to inspire the students already learning in the institution. The contribution from President, Secretary, teaching and non-teaching staff to even peons created a bond of sympathy and attachment with the students coming from different walks of life. A healthy relationship is established with society.

2) **Objectives of the practice:-** Today this undertaking has completed 14 years. Students get inspiration from this program. We realize a different sense of gratitude, respect towards the teaching staff members, non-teaching staff members as well as the executive members of the management. We have also noticed a spirit of healthy competition in order to fulfill the dream and turn it in to the reality of life. Students take special efforts to improve them at academic and quality level.

3) **The context:** - The context of this undertaking is to encourage the budding generation towards higher learning. Though we are leaving in the age of severe competition, students coming from middle class families or lower middle class families prefer to get some job of self-employment by doing certificate or diploma course after passing S.S.C. or H.S.C. and start to make a living. Taking in to consideration students as focus of concentration. We had under taken the innovative project generally on the auspicious occasion of the birth day of the founder president (i.e. on November 24) this memorable and grand function is being celebrated. The concept of this 'best practice' came into force from the imagination of the Founder President and Principal Mr.

Vishnupant Patil. We arrange this activity on his birthday under the title 'Felicitation of Meritorious Students'.

4) The practice:- Constraints and limitations:-

It is the moral duty of every educational institution to acknowledge and appreciate the academic co-curricular cultural social accomplishments of the students and honor them in a public function so that they may feel grateful for the institute where they had spent their precious time of life. The amount of prize or its format doesn't matter but it creates an urge in him or her to do something very substantial in the interest of society. He is always in a mood to accept the challenge in life because he can never forget the love sympathy being offered by his alma-matter. Whatever is imparted to him by the teaching community he can never forget it. Thus the society becomes young again and once again the spring comes back to the college campus. The person who accepts the challenge always grows in strength. The parents feel proud of their children and naturally the institute gets the credit and with the passage of time it flourishes. The ex-students of the college proved to be highly helpful and supporting when they enjoy and adorn the post of high position in administration they can do something very creative and long lasting in the interest of the college. Offering prizes or felicitating the students does not mean to make a show but it is some of gratitude towards the society. It sends a very good message to the message that the so and so college is really very nice and encourages the potentials among the students. Our college is distributing variety of prizes to the quality students it includes management, principal, teaching and non teaching staff members, so that an emotional bond with each member of college is established between himself, herself and the students. We are following this felicitation practice from summer 2003. The details of prizes

distributed among the student are endorsed here with these prospects. For example the details are given in the prospectus.

- 1) It is indeed difficult to raise the funds for this project from the staff members.
- 2) The President, The Secretary, the Principal have to give greater share to carry on the project.
- 3) When the students are newly admitted they are not acquainted with the surrounding of the college. The teaching staff members have to find out their potentials and encourage them accordingly.

5) Evidence of success:-

- 1) In order to get bright success in different field a kind of healthy emulation and competition is being observed.
- 2) An affection, affinity, attachment, respect increases at all levels among the students and teachers and even nonteaching staff members.
- 3) Students honestly feel that 'Arts College' means a place where a family atmosphere is being nurtured and they experience it. Students feel a sense of respect and attachment for the institution. Through their words they publish the goodwill among the masses about the college. The teaching staff members also fill that something out standing should be done by them so that their superior authorities will acknowledge them. Students look upon themselves fortunate to live in the atmosphere of calm and beauty, because they have a deep sense of regard for their teachers as they have for their parents. When the students come to know that success is not a destination but a continuous journey, then and then only he will work consistently with perseverance. Alumni Association plays a vital role to inspire the existing batches at today. The very purpose
