

## Institutional Distinctiveness

The present era is an era of information where communication has become faster due to innovations in technology. There is a constant explosion of information which needs to be communicated to the students instantly using the means of technology. No college can afford to keep its students behind in the dissemination of knowledge. It is in this context that the college has adopted ICT-based teaching methods for its students. Research is an integral part of teaching and for research; the college has given top priority and put more thrust on it. This is area in which the college has and is still building its reputation. This is the area which is distinctive of the college's performance.

### ICT DEVELOPMENT -

The college has made the best possible efforts to ensure ICT-based culture and temper in the campus. Not only the Principal but also the faculty members have their own computers/ laptops with printer and internet connectivity. The entire work of the college is done by them using their own computers/ laptops To make students acquainted with computers, the college has provided computers in the Department of computer lab. At the computer lab the students sit and download information related to their study topics. Similarly, the students learn various study topics & skills on the computers besides watching dramas, movie, novels, etc.
